STATINTL

Dear Jim:

The reorganization of our S&T activities which has been mentioned to you before has made some progress but as is usual in such matters, a great deal of time will still be required before everything is settled. I'm still not entirely clear therefore on what the full West Coast needs of the DD/R, pertinent to your suggestion, will be. At this time I would expect that the major area of interest will develop along ELINT lines. George Miller has been appointed AD for the office in which we are concentrating these activities. I would suggest that you contact him at your convenience. I have already discussed with him your letter of July 28.

In the development and strengthening of our efforts we need some good technical people here in Washington. We would appreciate any suggestions and leads that you might be able to provide.

Sincerely yours,

Signed Herbert Scoville, Jr.
